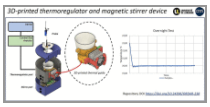
Issue Highlights

Hardware Article • *Open Access*



3D-printed thermoregulator and magnetic stirrer device

Dutreuil et al.

Published online: July 28, 2026

Research Article • *Open Access*

Low-cost programmable sine wave driver for inductive loads with built-in current sensing

Labuda et al.

Published online: July 27, 2026

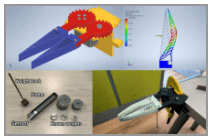
Hardware article • *Open Access*

Low-cost head-mounted camera system for medication-error detection

Nsumba et al.

Published online: July 17, 2026

Hardware article • *Open Access*



Fin-Ray soft gripper for object manipulation with multi-robot systems

Velasquez et al.

Published online: July 15, 2026

About

HardwareX

HardwareX is a multidisciplinary, open access, peer-reviewed journal which publishes articles that describe

Editorial Board

Editor-in-Chief

Joshua M. Pearce, PhD

Western University, Department of Electrical & Computer Engineering,

Abstracting & Indexing

This journal has been indexed in:

Emerging Sources Citation Index (ESCI)
Scopus
Ei Compendex
Directory of Open Access Journals (DOAJ)
INSPEC
PubMed Central
PubMed

the design, construction and customization of scientific devices and equipment.

HardwareX promises to make scientific hardware **reviewed**, **accessible**, **discoverable**, **citable**, **comprehensible** and **reproducible**.

More

Thompson Centre for Engineering Leadership & Innovation, Ivey Business School, London, Ontario, Canada

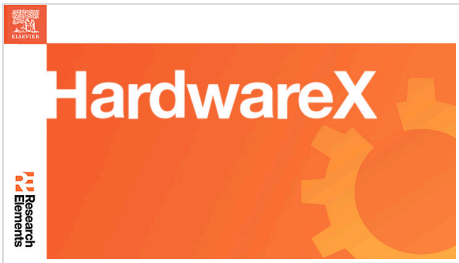
Call for Papers

Open-source medical devices

Open-source decarbonization for a sustainable world

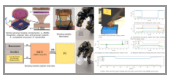


HardwareX Podcast

The HardwareX podcast brings together voices from the open hardware community. Hear directly from leading researchers and innovators about their work, challenges, and innovations shaping the future of hardware-enabled science.

HardwareX Catalogue

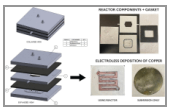
Automation or Robotics»



BioIn-Tacto: A compliant multi-modal tactile sensing module for robotic tasks

Alves de Oliveira et al.

Chemistry »



Low cost 3D printable flow reactors for electrochemistry

Heeschen et al.

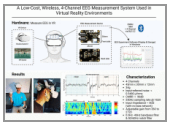
Digital Manufacturi

Easy to build, modular and large scale pipe conveying fluid experimental setup

Demenois et al.

Education»

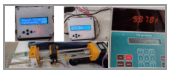
A low-cost, wireless, 4-channel EEG measurement system used in virtual reality environments



Yu et al.

Field Measurements and Sensors»

Autotitrator based on an Arduino Open Source Pump



del Castillo-Santaella et al.

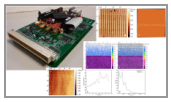
Imaging Tools »

P-TDHM: Open-source portable telecentric digital holographic microscope

Jin et al.

Low-Cost Alternative»

Scanning Probe Microscopy controller with advanced sampling support



Valtr et al.

Neurosciences »

Development of an Arduino-based, open-control interface for hardware in the loop applications

Kvalsund et al.

Unmaned Vehicles»

Monitoring multiple parameters in complex water scenarios using a low-cost open-source data acquisition platform

Martinez Vargas et al.

Microfluidics»

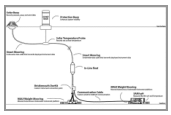
APELLA: Open-Source,

miniaturized All-in-One powered Lab-on-a-Disc platform

Serioli et al.

Most Read (Last 30 Days)

Hardware Article • *Open Access*

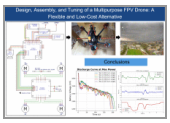


Real-time acidification monitoring through Sofar buoy and SAMI-pH integration

Gill et al.

Published online: April 16, 2026

Hardware article • *Open Access*



Design, assembly, and tuning of a multipurpose FPV drone: A flexible and low-cost alternative

Arenas Mamani et al.

Published online: July 30, 2025

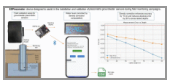
Hardware Article • *Open Access*

Development of an automated fruit classification system by using computer vision and deep learning

Mac et al.

Published online: April 22, 2026

Hardware Article • *Open Access*

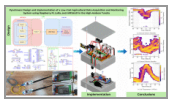


ESPiezometer: ESP32-based field tool for installation and validation of piezometric sensors for groundwater level monitoring

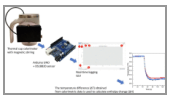
Blanco-Jáquez et al.

Published online: April 15, 2026

Hardware article • *Open Access*



Hardware Article • *Open Access*



DIY Arduino calorimeter: Converting commercial thermally insulated coffee-cups into precision isobaric calorimeters

Bentancor et al.

Published online: March 11, 2026

PyLoGreen: Design and implementation of a low-cost agricultural data acquisition and monitoring system using Raspberry Pi, LoRa, and nRF24L01 in the High-Andean Tundra

Carpio Hallasi et al.

Published online: April 7, 2026

Most Cited (Previous 3 Years)

Open Access

ROBOTONT – Open-source and ROS-supported omnidirectional mobile robot for education and research

Raudmäe et al.

Hardwarex, Vol.14, e00436

June 2023

Open Access

Low-cost inertial microfluidic device for microparticle separation: A laser-Ablated PMMA lab-on-a-chip approach without a cleanroom

Rodríguez et al.

Hardwarex, Vol.16, e00493

December 2023

Open Access

RaspyControl Lab: A fully open-source and real-time remote laboratory for education in automatic control systems using Raspberry Pi and Python

Álvarez Ariza et al.

Hardwarex, Vol.13, e00396

March 2023

Open Access

A low-cost robotic hand prosthesis with apparent haptic sense controlled by electroencephalographic signals

Cutipa-Puma et al.

Hardwarex, Vol.14, e00439

June 2023

Open Access

Multipurpose deep learning-powered UAV for forest fire prevention and emergency response

Rathod et al.

Hardwarex, Vol.16, e00479

Open Access

SMART GROW – Low-cost automated hydroponic system for urban farming

Shin et al.

Hardwarex, Vol.17, e00498

March 2024

December 2023
